GRP IS COMMONLY KNOWN AS
GLASSFIBRE/FIBREGLASS AND IS
FORMED BY REINFORCING A
CHOPPED STRAND MAT WITH
POLYESTER RESIN

(in a choice of colours although grey is most common)
AND CURED WITH A PEROXIDE BASED
CATALYST, ONCE CURED THIS
FORMS A LAMINATE THAT WILL
OUTLAST ANY TRADITIONAL
ROOFING MATERIAL WHICH CAN BE
WALKED ON JET WASHED AND IF
DAMAGED CAN EASILY BE
PERMANENTLY REPAIRED UNLIKE
FELT WHICH CAN BE HARD TO
REPAIR,
GRP IS MAINTENANCE FREE BUT IF
NEEDED IT CAN BE JET WASHED OR
SCRUBBED WITH A BRUSH (DON'T DO
THIS WITH FELT ROOFS).

OTHER SERVICES INCLUDE

FASCIA SOFFIT AND GUTTERS,
CLADDING,
RE-ROOFS/ROOF REPAIRS,
FIRESTONE RUBBER ROOFS,
DRY VERGES,
RIDGES AND VALLEYS RE-POINTED/
REPAIRED,
GRP DOOR CANOPIES,
CAR PORT ROOFS,
FLAT ROOF TO PITCH CONVERSIONS,
TIMBER FASCIA REPLACEMENT

Free, no obligation quotes, available upon request. We do not charge for call outs, neither do we have door knockers or sales reps, most our work comes from referrals, which are also available upon request. We offer free advice , and offer guarantees (in writing) on the majority of our work. We are based in Great Wyrley, though our work takes us all over the Midlands.

?GRP Fibreglass Flat Roofing Questions?

Below are some of the main questions that people ask. If you have a question that is not listed or answered we will be happy to answer all your questions, on 01922 418977.

Q: Is this a new idea?

A: GRP (Glass Reinforced Plastic) or fibreglass has been used for many years for all kinds of products. Boats and pond liners are a couple of products that many people would associate with it. It is light, durable, waterproof, seamless and lasts for many years. Where better to use this but on your roof. Lots of people have installed this on their roof and have enjoyed it for many years so it is not a new idea its just that people are seeing the advantages, benefits of saving money and a maintenance free roof.

Q. I have a balcony that we use during the summer can I have a non slip surface?

A. Yes, some customers prefer a non slip surface.

Q. Is the 25 year Guarantee transferable if I sell my property?

A. Yes, the 25 year Guarantee is transferable to future owners of your property. It has the added bonus of a further selling point when advertising your property for sale. This is an important consideration for buyers knowing that they have complete protection and peace of mind.

Q. My roof is dirty how can I clean it?

A. Your GRP roof can be swept clean as there is no problem walking on it. You can even use a pressure washer on it knowing there are no seams or joints. Do not use a pressure washer on felt roofs as water could penetrate the seams and would break down the roof covering.

Q. Can I have a different colour?

A. Yes, all colours are BSI approved. Please ask to see our colour range. There are thirty nine different colours although we recommend a light grey colour to diminish thermal gain.

Q. Can puddles or ponding be eliminated completely?

A. If the roof requires additional fall new firrings will be put in. This will help to eliminate any puddling effects on refurbished roofs. However this might not totally get rid of puddling but as GRP roofing products are totally seamless with no joints, glue or welds no water will penetrate the roof from the deepest of puddles. Unlike felt a GRP roof is not absorbent therefore will not hold water. Any water that does collect will soon evaporate through normal weathering.

Q. How long will a GRP roof last?

A. The truth is we don't know. Boats made of the same material over fifty years ago are showing no signs of breakdown and are still seaworthy today. And the scout hut in Great Wyrley has a GRP roof that is over 23 years old with no sings of aging nor failing
